

Application No. 09/887,977
Amendment dated January 18, 2006
Reply to Office Action of October 18, 2005

Docket No.: 0941-0293P

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A method for switching between multiple SIM cards within a telephone, comprising the steps of:

storing a plurality of internal ID codes, each of which identifies a direct service provider of one of the SIM cards;

storing a priority table comprising priorities of cooperation of ~~for~~ the SIM cards with the compatible service provider;

receiving an ID code identifying one of the service providers;

comparing the received ID code to each of the internal ID codes; and

switching to one of the SIM cards according to the priorities when the service provider identified by the received ID code is recognized as the compatible one of the SIM card switched to, identified by the corresponding internal ID code.

2. (Original) The method as claimed in claim 1 wherein the internal ID codes further identify a provider compatible with the direct providers of the SIM cards.

3. (Cancelled)

4. (Currently Amended) The method as claimed in claim 1 wherein the priorities correspond to fee rates under the cooperation for the SIM cards with the compatible service provider and the fee rate of the cooperation of ~~for~~ the SIM card switched to with the compatible service provider is the lowest.
